

Anti-Idling Observation Form

Use this form to record idling behavior around your school. Begin by recording type of vehicle (car, station wagon, sports utility vehicle). Then, look at your watch and record the time the car begins idling. You can make observations on multiple cars at the same time. When the car stops idling, record the time again. Finally, calculate the total number of minutes each vehicle idled.

- 1 Look**
 for exhaust fumes.
- 2 Listen**
 for the engine.
- 3 Watch**
 if vehicle vibrates.
- 4 Check**
 if headlights are on.

Vehicle (make / model)	Idling?	Start time	Stop time	Minutes Idling	Activity (circle one)
